

Your Article. A Carousel. Done.

LinkedIn carousels drive massive engagement. But designing each slide is a chore. Posta turns text into a ready-to-post PDF in one API call.

Why Carousels Win

More swipes = more dwell time. That's what the feed rewards. Remove the design friction and carousels become your default format.

Posta Automates the Pipeline

LLM condenses your article into punchy slides. AI generates on-brand backgrounds. Posta composites text, stitches PDF, ready to post.

getposta.app

Legible on Any Background

Diffusion models can't draw readable text. Posta renders white text with an outline and a subtle scrim — always crisp, always on-brand.

Try It Free

Carousels stop being a chore when they're one API call away. Start your 14-day trial — no credit card required.
